```

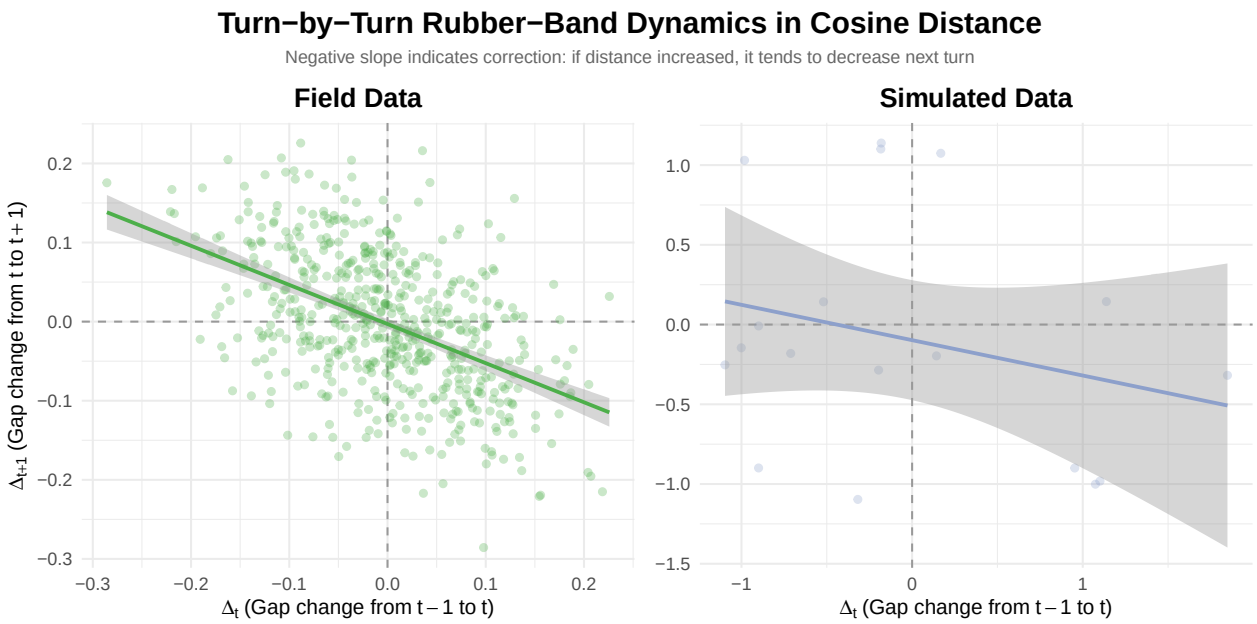
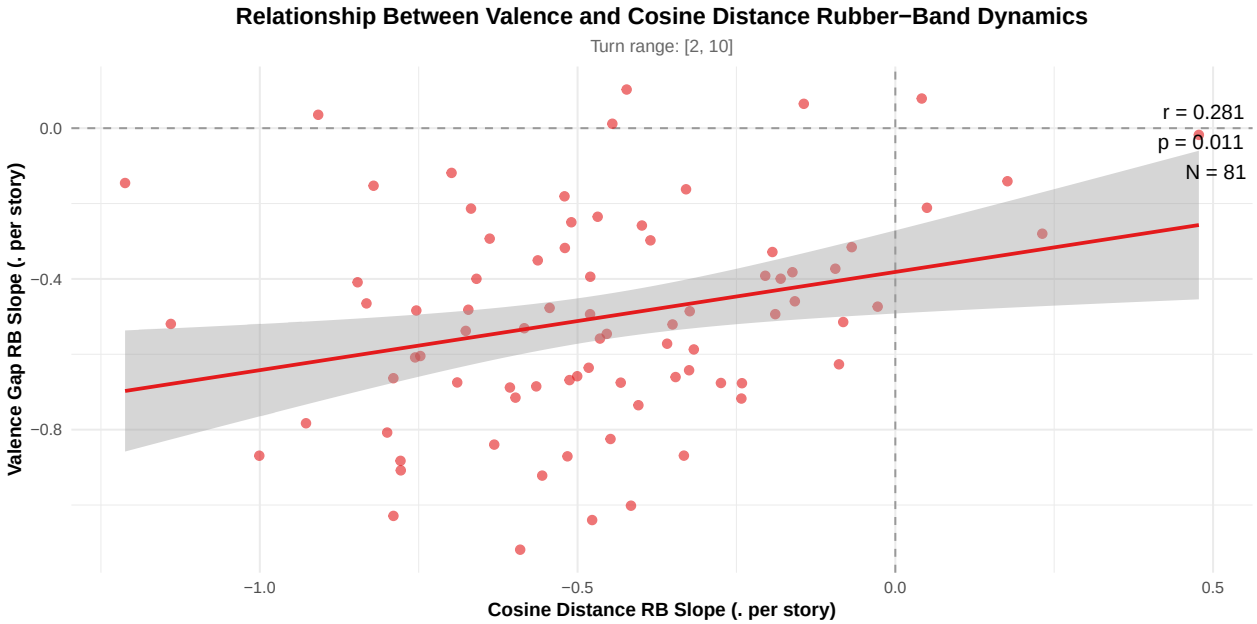
4.8 4.7 Turn Level Cosine RB Linear plot



4.9 4.8 Correlation Between Cosine Distance and Valence Rubber-Band

```
## === Correlation Between Valence and Cosine Distance Rubber-Band ===
## Turn range: [2, 10]
## N observations (turn-level): 567
## Turn-level correlation of gap changes (Δt): 0.032
##   Interpretation: Do valence and cosine gaps change in the same direction
##                   at the same turn across all stories?
## Turn-level correlation of next changes (Δt+1): 0.024
##   Interpretation: Do subsequent valence and cosine corrections correlate?
## N stories with >= 3 turns: 81
## N stories with >= 3 turns: 81
## STORY-LEVEL correlation of RB slopes: 0.281
##   Interpretation: Across stories, does valence RB strength predict cosine RB strength?
##                   Positive r means stories with strong valence correction
```

```
##                    also show strong cosine distance correction.
##   95% CI: [0.067, 0.47]
##   p-value: 0.0111
##   df: 79
## Shared variance (R²): 0.079
## Interpretation: 7.9 % of variation in valence RB slope
##                 is explained by cosine distance RB slope
```



```
##
## === Regression: Cosine RB Predicting Valence RB ===
##                   Estimate Std. Error   t value     Pr(>|t|)
## (Intercept)     -0.3815065  0.0553939 -6.887156 1.227194e-09
